

AirStar™ DSL

DUAL SPLASH LUBRICATION VACUUM PUMP

INNOVATIVE & DURABLE

AIRSTAR DSL

HIGH QUALITY PUMP

PROVEN DESIGN

The AirStar DSL vacuum pump is more durable and long-lasting than ever and provides a stable, reliable and efficient vacuum level in the heart of your milking system.

The AirStar DSL is suited to dairy farm conditions and will meet your needs, no matter whether your installation is large or small.

Reliable vacuum pump made to last

- **Reduced noise** – Pump runs quietly due to the fact that no moving parts come into contact with each other.
- **Environmentally friendly** – Dry vacuum pump, no emission of pollutants.
- **Increased pump efficiency with BouMatic's Variable Speed Drive** – The optional VSD monitors vacuum levels and will supply all the air your system needs, but at a much more efficient, cost-saving level.
- **Produced to meet rigorous performance standards** – Manufactured in an ISO 9001 facility.
- **Robust design** – No friction between moving parts for reduced wear and tear and increased pump life.
- **Available as a complete vacuum supply assembly or as a pump only.**
